MHT LIGHTING AWARDED LARGE STREETLIGHT PROJECT IN NEW YORK STATE

STATEN ISLAND, N.Y., Sept. 2012 MHT Lighting, a leading manufacturer of energy-efficient lighting and energy management systems, announced today that it has been awarded a contract to provide 2,800 street lamps, which will be installed in a New York municipality before the end of the year.

“MHT Lighting was selected for this job not only for the quality of our products, but also for the rigorous testing we put each and every light through,” said MHT CEO Tom Spinelli. “We are proud to be an ISO 9000/01 certified facility and, as a result, have built a reputation as having one of the most reliable products on the market today.”

The fixtures to be installed are MHT’s Green Roadway streetlight fixtures. They provide the highest quality of bright white light to help make the roadways safe. The fixtures save between 40-80 percent energy over HID sources and meet the American Recovery and Reinvestment Act (ARRA) of 2009 requirements set in place by President Barack Obama.

The Green Roadway street lamps have an IESNA-rated 100k hour lifespan and are warranted for 10 years/60k hours.
