

## INSTALLATION INSTRUCTION

MHTL-CUBE

### MHTL-CUBE Series Suspended Cable Mount

#### Warnings:

- Supply Input Voltage is 110V to 277V within 10% tolerance.
- This product is to be installed and serviced by a qualified electrician.
- The Luminaire should be installed in an area with good ventilation, clear of any corrosive or combustible gases and explosive objects.

#### Installation Instructions:

##### Suspended (Standard)

1. The two mounting points on the top side of fixture are 26" away for CUBE-4 fixture and 66 5/16" away for CUBE-8 fixture. Measure and mark the ceiling accordingly.
  2. Attach the two provided anchors to the ceiling. (Spacing as indicated above)
  3. Secure two metal bases from aircraft cable to the anchors using provided screws.
  4. Screw in the non-adjustable end of aircraft cable to the metal bases mounted on the ceiling.
  5. Screw in the adjustable end of aircraft cable to fixture and adjust cable for desired mounting.
  6. Balance fixture and plug in power source to the fixture.
- (Canopy Kit is available and ordered separately)
